

Data.... Where does everything go?

Data and photographs should be put onto the google drive before we go out for the next field day

Photographs of tagged colonies

- **Put photos into drive to be relabeled and organized:** Google Drive> SCTLD Tracking > Country>Trip>Photos>Site

Molecular Sampling Sheet Data

- **Update sample data:** GitHub> SCTLD Samples > Sample_Data> Country_Samples
- **Update colony data as well :** GitHub> SCTLD Samples > Sample_Data> Country_Colony

Coral Demographics Data

- **Find datasheet in :** GitHub> SCTLD Samples > Survey_Data> MarineGEO_Caribbean_coral_data_entry_template
- **Copy and paste your version into the “main branch” version:** GitHub> SCTLD Samples > Survey_Data>Country_Coral_Demographics

Coral Conditions Data

- **Find data sheet in:** GitHub> SCTLD Samples > Survey_Data> MarineGEO_Caribbean_coral_data_entry_template
- **Copy and paste your version into the “main branch” version:** GitHub> SCTLD Samples > Survey_Data> 1. Country_Coral_Conditions

Coral Condition Photos

- **Upload photos to drive:** Google Drive> SCTLD Tracking
>Country>Trip>Photos>Site>Coral Conditions

Photoquadrats (PQs)

- **Upload photos to drive:** Google Drive> SCTLD Tracking > Country>Trip>Photos>Site> PQs

PDFs of ALL physical data sheets

- Use "notes" app (on iphone), open a new note, click the camera and then select "scan documents" to **scan all physical data sheets.**
- Name each one Data Sheet Name_Site _Month_Year
- **Upload to drive:** Google Drive> SCTLD Tracking>Country> Site> DataSheets
- Once datasheet has been entered write "entered" and the date
- Once a datasheet had been uploaded to drive put a dot next to the "entered"

[illegible]
